

Serving trays

Made from Alligator Juniper and finished with polyurethane varnish.

Care:

Wipe with a damp cloth and dry immediately. Do not immerse or put in dishwasher.

This tray is not intended to be used as a cutting board; doing so will cause permanent damage to the finish and likely cut into the wood itself. If the finish is damaged or if dampness should cause the grain to rise, sand with 320 sandpaper until smooth and apply wipe-on or spray polyurethane. Allow at least a week before using to serve food again.

All of our wood pieces are made from reclaimed wood. This consists of windfall, drought kill, pruning, fire kill and thinning done by the National Forest Service.
